

Lunar Explorations:

15. Alphonsus

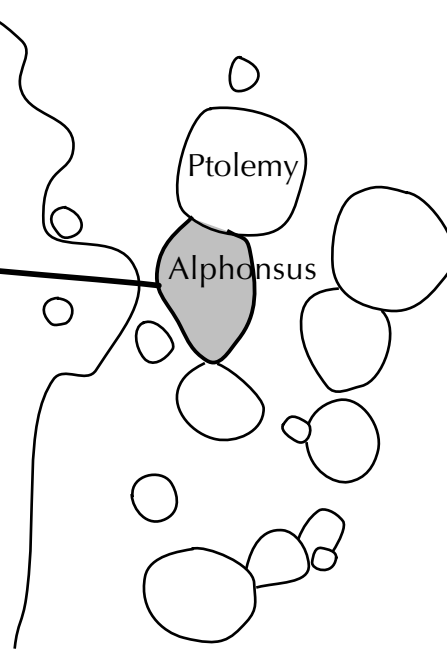

Oceanus
Procellarum

Ptolemy

Alphonsus

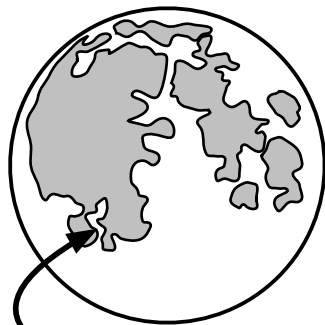

Best seen: April 10; April 23, 2022.

Circa 1900. William Pickering attributed indistinct, dark areas on the crater floor to changing vegetation. He believed that he also saw snowstorms on its central peak.

Lunar Explorations:

16. Bullialdus

Oceanus
Procellarum

Mare
Nubium

Bullialdus

Best seen: April 12; April 25,
2022.

Circa 1900. Suspected
snowstorms on the central
peak were glimpsed by
William Pickering.

Mare
Humorum
