

Lunar Explorations:

15. Alphonsus

Oceanus
Procellarum

Ptolemy

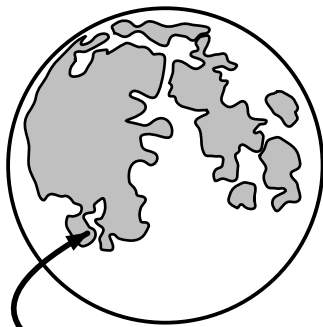

Alphonsus

Best seen: April 1 & 30 (morning); April 18 (evening), 2024.

Circa 1900. William Pickering attributed indistinct, dark areas on the crater floor to changing vegetation. He believed that he also saw snowstorms on its central peak.

Lunar Explorations:

16. Bullialdus

Oceanus
Procellarum

Mare
Nubium

Bullialdus

Best seen: April 2 (morning); April 19 & 20 (evening), 2024.

Circa 1900. Suspected snowstorms on the central peak were glimpsed by William Pickering.
