

# Lunar Explorations:

## 15. Alphonsus

Oceanus  
Procellarum

Ptolemy

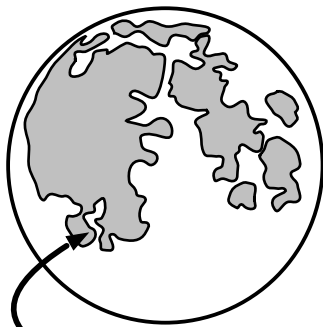

Alphonsus

Best seen: April 11 & 12 (morning); April 28 (evening), 2023.

Circa 1900. William Pickering attributed indistinct, dark areas on the crater floor to changing vegetation. He believed that he also saw snowstorms on its central peak.

# Lunar Explorations:

## 16. Bullialdus

Oceanus  
Procellarum

Mare  
Nubium

Bullialdus

Best seen: April 2 (evening); April 14 (morning), 2023.

Circa 1900. Suspected snowstorms on the central peak were glimpsed by William Pickering.
